Dear Sir:

I currently am a Pediatric Nephrologist and an Associate Professor of Pediatrics at Brown University. In addition to my patient care and teaching responsibilities, I have an active productive research laboratory investigating the cellular actions of antidiuretic hormone and aldosterone with possible correlations to hypertension. I would be interested to know whether your foundation is supporting biomedical research and if so, whether an application for research support funding could be sent to me.

Thank you for your kind consideration in this matter.

Sincerely yours,

Andrew S Brem
